Fortunes In Faces

There's often much truth in the saying "her face is her fortune," but it's never said where pimples, skin eruptions, blotches, or other blemishes disfigure it. Impure blood is back of them all, and shows the need of Dr. King's New Life Pills. They promote health and beauty. Try them. 25 cents at all druggists.

CHURCHES TO DENOUNCE CURE FRAUDS

National Crusade on Tuberculosis Day
Against Use of Fake Remedies
for Consumption

From thousands of pulpits in all parts of the United States, fake cures for consumption will be exposed and denounced on Tuberculosis Day, Oct. 27. This is part of the program for the movement announced today by the National Association for the Study and Prevention of Tuberculosis.

Literature giving information on fraudulent and alleged "cures" for consumption will be sent to clergymen all over the country, and an organized crusade against the traffic in these drugs and devices will be instituted. The literature will be sent to ministers either directly from the National Association office in New York or through the many state and local anti-tuberculosis associations scattered throughout the country. It is estimated that over 100,000 clergymen will be reached in this way.

From actual records on file in the office of The National Association, it is estimated that the volume of business done annually by the various concerns who sell fake remedies for tuberculosis amounts to well over \$15,000,000. The number of these remedies now being used as so-called "cures" is over 500.

Three classes of "cures" are distinguished by the National Association. In the first class are included hundreds of devices and drugs which can be bought for any sum ranging from ten cents to five dollars at a drug store. The second class of "cures" includes the "institutes," professors, or companies of "doctors," who for a consideration guarantee to cure consumption by some secret methods of which they are the sole proprietors. There are nearly one hundred-fifty of these institute franchises in the United States, cheating the people out of millions of dollars annually.

In the third class of "cures" are placed a number of home-made remedies, which either through ignorance or superstition have been advanced as treatments for tuberculosis. Some of these are onions, lemons, rattlesnake poison, coal dust, lime dust, pigs' blood, dog oil, milk "strippings," and even alcohol.

None of these remedies will cure consumption, declares the National Association. No drugs, gas or other material has yet been discovered, which, when eaten, inhaled or injected into the system, will kill the germs of tuberculosis without doing serious injury to the body. The only real cure for tuberculosis recognized by The National Association consists of the combination of fresh air, good food, and rest taken under the direction of a competent physician.

J. W. Copeland, of Dayton, Ohio, purchased a bottle of Chamberlain's Cough Remedy for his boy who had a cold, and before the bottle was all used the boy's cold was gone. Is that not better than to pay a five dollar doctor's bill? For sale by All Dealers.
